

## Perimeter Insulation Foam

Perimeter Insulation Foam is used to provide a thermal break and space for expansion around heated floors.

- Provides a thermal break around the perimeter of a heated floor to prevent heat loss into the fabric of the building.
- Provides room for expansion in tiled and floating floor build ups.
- Lightweight and easy to cut and work with.

### Technical data

Code	PIF-50-050
Material	PE Foam
Size	W 80mm x L 50 m
Thickness	5mm
Density	20-25kg/m <sup>3</sup>
Thermal conductivity ISO 80301	0.040 W/m.K (at 10°C)
Compressive strength	0.02N/mm <sup>2</sup> (at 25%) 0.07N/mm <sup>2</sup> (at 50%)
Fire Class	B3
Colour	White
Warranty	Lifetime
